DESCRIPTION

PARADE L linear luminaires are available in one-foot increments up to four feet overall length. Each model features premium quality high brightness LEDs and a comprehensive selection of ten light distributions. Adjustable brackets are available in three standard lengths. Standard built-in programming capabilities include economical stand-alone operation or master-satellite configurations without the use of external control systems, or operation by remote DMX512 control systems. Four standard finishes are available with options for marine-grade or custom RAL finishes on request. All hardware is stainless steel.

CONTROL OPTIONS (DMX512, PRIMARY CONTROL PLATFORM)

Contact manufacturer for control system development.

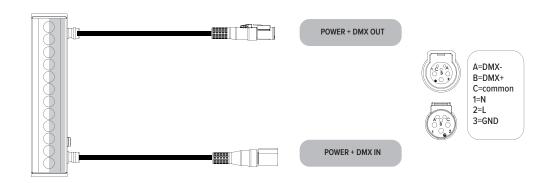

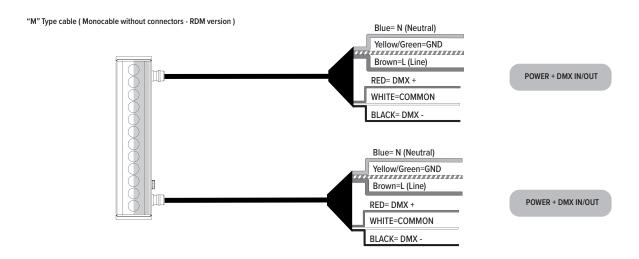

NOTES:

- 1. Wire specifications are available from factory as well as approved wire for purchase.
- 2. Other control protocol solutions available. Contact factory for more information.
- Wireless components are external to fixture. Distance limitations based on antennas chosen and site conditions. Contact factory for more information.
- 4. Based on maximum of 32 fixtures per run as well as any site constraints on conveyance of data.
- 5. For example: Lutron, Crestron, Encelium, Douglas, ETC by others. Griven control system will interface with building lighting control system.
- 6. Local wall controller for small applications. Wall controllers specified separately for larger systems.
- 7. Contact factory for assistance with specification. Onsite commissioning by Griven of control system is required.
